MD. ATIQUZZAMAN SNIGDHO

Software Engineer | Full-Stack Development | Cloud Solutions

+8801775350203 atiquzzamansnigdho@gmail.com linkedin Github

Mohammodpur, Dhaka, Bangladesh

SUMMARY

Software Engineer with 3+ years of experience designing, building, and maintaining production-grade backend systems. Specialized in React, Python, Django, REST APIs, background processing, mobile apps with Flutter and data-intensive applications. Strong ownership of core services, database design, performance optimization, and system reliability. Actively mentor junior engineers and enforce clean architecture and backend best practices.

EXPERIENCE

Software Engineer

A Maze Venture

09/2023 - Present Niketon, Gulshan

- Core backend engineer for Braincount, an enterprise campaign monitoring and analytics platform
- Designed Django REST APIs for campaign management, monitoring logs, assets, and report
- Built background workers using Celery and Redis for data processing and scheduled tasks
- Optimized database queries and indexes to handle large monitoring datasets efficiently
- Ensured API performance, stability, and scalability across concurrent campaigns
- Directed and supported junior developers using modern frameworks, such as Angular and Node.js, promoting code quality and maintainability
- Collaborated with frontend, product, and operations teams to translate business workflows into backend services.
- Reviewed code, guided junior developers, and enforced backend engineering standards
- Supported production deployments and monitored live systems on Linux servers

Junior Software Engineer

Mysoftheaven

02/2023 - 08/2023 Pirerbag, Mirpur-2

- Developed mobile apps.
- Integrated backend services with Flutter mobile apps.
- Improved application performance and data consistency.
- Participated in testing, deployment, and production support.

Software Engineer Intern

Machine Xtreme LLC

06/2021 - 11/2018 Mirpur-10

- Developed Mobile Apps
- Integrated backend services with flutter mobile apps
- Improved application performance and data consistency
- Contributed to the creation of a customer support chatbot using AI technologies, enhancing customer service response times by 40%

CORE COMPETENCIES

System Architecture & Design

Microservices, API design, database modeling, scalability planning

Backend Development

Django, Flask, Node.js/Express, RESTful & GraphQL APIs

Frontend Technologies

React.js, TypeScript, Responsive UI/UX design

PROJECTS

Braincount — Enterprise Campaign Monitoring & Analytics Platform

https://braincount.net/

Purpose

Braincount is a tech-driven out-of-home (OOH) advertising analytics platform, built to bring transparency, audience measurement, and ROI tracking to billboard and outdoor ad campaigns.

Key Contributions

- Co-developed Bangladesh's first data-driven OOH advertising intelligence platform
- Designed and implemented backend services to process location-based and IoT-derived campaign data
- Built RESTful APIs for campaign configuration, monitoring, and analytics reporting
- Implemented background data processing pipelines using Celery and Redis
- Developed analytics services to measure audience exposure, campaign reach, and ROI
- Ensured real-time performance analytics for ongoing campaigns
- Optimized database schemas and queries to support large datasets and concurrent campaigns
- Supported production deployments and monitored live systems
- Collaborated with frontend and operations teams to convert business requirements into backend services

Tech Stack

Python · Django · React · Django REST Framework · MySQL · Celery · Redis · DigitalOcean

Papercable — Data-Driven PR & Media Outreach Platform

https://papercable.com/

Purpose

Papercable is a data-driven PR outreach tool designed to track media engagement and measure the effectiveness of communication campaigns.

Key Contributions

- Engineered analytics pipelines to collect and process media engagement data
- Built backend APIs to support campaign tracking and reporting dashboards
- Designed database models to store campaign performance and outreach metrics
- Integrated backend services with frontend dashboards for real-time insights
- Enabled data-backed decision-making for PR and media strategies
- Design Frontend and Implement apis

Tech Stack

Django · MySQL · REST APIs · React · Material UI

CORE COMPETENCIES

Mobile Development

Flutter/Dart, cross-platform app development

Data & Performance

PostgreSQL, MySQL, Redis, caching strategies, query optimization

Cloud & DevOps

AWS, Docker, CI/CD pipelines, testing

Leadership & Mentorship

Code reviews, junior developer coaching, Agile practices

TECHNICAL SKILLS

Languages & Frameworks

Python · Django · Flask · JavaScript · TypeScript · React.js · Node.js · Dart · Flutter · CSS · HTML

Databases

PostgreSQL · MySQL · MongoDB · Redis

Tools & Platforms

Git · GitLab · Docker · Celery · Nginx · AWS · EC2 · S3 · RDS · DigitalOcean

Other

Redux · Tailwind CSS · Material UI · Chakra UI · Webpack · Socket.io · GitLab CI/CD

EDUCATION

B.Sc in Computer Science & Engineering

Daffodil International University-DIU

01/2018 - 01/2022 · Dhaka

GPA 3.12 / 4.0

LANGUAGES

Bangla	Native	**English**	Advanced

Omnichannel - Centralized Dashboard Platform

https://omni.reachableads.com/

Purpose

A centralized platform for planning, executing, and optimizing multi-channel marketing campaigns across web and social platforms.

Key Contributions

- Developed fronetnd and backend services for campaign planning, execution, and tracking
- Built APIs to aggregate performance data from multiple channels
- Implemented real-time performance monitoring for active campaigns
- Optimized backend workflows to support scalable, concurrent campaign operations
- Collaborated with frontend teams to deliver end-to-end campaign management tools

Tech Stack

Django · MySQL · REST APIs · React · Tailwind CSS

Chobirbaksho — AI-Assisted Content Creation Platform

https://chobirbaksho.com

Purpose

An AI-assisted digital media platform designed to accelerate content production through automated image, video, and audio processing.

Key Contributions

- Built backend services to support automated content processing workflows
- Integrated asynchronous task execution using Celery for media processing
- Implemented real-time communication features using Socket.io
- Designed backend APIs to manage content assets and processing states
- Improved content production efficiency through backend automation

Tech Stack

Django · Celery · Redis · Socket.io · REST APIs· React · Tailwind CSS

DBID — Secure Digital Identity Application

https://play.google.com/store/apps/details?id=com.mysoftheaven.dbid&hl=en

Purpose

A secure digital identity solution enabling users to manage personal information and application processes safely.

Key Contributions

- Developed backend modules for authentication and account verification
- Designed secure data storage and access mechanisms
- Integrated backend services with Flutter-based mobile frontend
- Contributed to application tracking and identity verification workflows
- Ensured data integrity and security best practices

Tech Stack

Flutter · Firebase · Authentication Systems · Push Notifications · Getx
